3) Cash Flows Differences

The Company applies ROC SFAS No. 17, "Statement of Cash Flows". Its objectives and principles are similar to those set out in U.S. standards. The principal differences between the two standards relate to classification. Cash flows from investing activities for changes in other assets, and cash flows from financing activities for changes in customers' deposits and other liabilities are reclassified to operating activities under U.S. standards. In addition, the effect of change on consolidated subsidiaries, which was shown as a separate item under ROC standards, is reclassified to investing activities under U.S. standards

Note 1: There is a significant difference in the classification of items on the statements of income under ROC GAAP and US GAAP. This item includes:

Gains (losses) on disposal of property, plant and equipment and other assets, and impairment loss on property, plant and equipment and other assets, and loss arising from natural calamities:

- Under ROC GAAP: Such accounts are included in non-operating income (expenses).
- Under US GAAP: Such accounts are included in cost of revenues.
