INDEPENDENT AUDITORS' REPORT

The Board of Directors and Stockholders
Chunghwa Telecom Co., Ltd.

We have audited the accompanying consolidated balance sheets of Chunghwa Telecom Co., Ltd. and its subsidiaries (the "Company") as of December 31, 2014 and 2013, the related consolidated statements of comprehensive income and change in equity and cash flows for the years ended December 31, 2014 and 2013. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the Rules Governing the Audit of Financial Statements by Certified Public Accountants and auditing standards generally accepted in the Republic of China. Those rules and standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Company as of December 31, 2014 and 2013, and their consolidated financial performance and their consolidated cash flows for the years ended December 31, 2014 and 2013, in conformity with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) endorsed by the Financial Supervisory Commission of the Republic of China.

We have also audited the parent company only financial statements of Chunghwa Telecom Co., Ltd. as of and for the years ended December 31, 2014 and 2013 on which we have issued an unqualified report.

Deloitte & Touche

CHUNGHWA TELECOM CO., LTD. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

YEARS ENDED DECEMBER 31, 2014 AND 2013

(In Thousands of New Taiwan Dollars, Unless Stated Otherwise)

1. GENERAL

Chunghwa Telecom Co., Ltd. (“Chunghwa”) was incorporated on July 1, 1996 in the Republic of China (“ROC”) pursuant to the Article 30 of the Telecommunications Act. Chunghwa is a company limited by shares and, prior to August 2000, was wholly owned by the Ministry of Transportation and Communications (“MOTC”). Prior to July 1, 1996, the current operations of Chunghwa were carried out under the Directorate General of Telecommunications (“DGT”). The DGT was established by the MOTC in June 1943 to take primary responsibility in the development of telecommunications infrastructure and to formulate policies related to telecommunications. On July 1, 1996, the telecom operations of the DGT were spun-off as Chunghwa which continues to carry out the business and the DGT continues to be the industry regulator.

As the dominant telecommunications service provider of domestic and international fixed-line, Global System for Mobile Communications (“GSM”), and Third Generation (“3G”) in the ROC, Chunghwa is subject to additional regulations imposed by the ROC.

Effective August 12, 2005, the MOTC had completed the process of privatizing Chunghwa by reducing the government ownership to below 50% in various stages. In July 2000, Chunghwa received approval from the Securities and Futures Commission (the “SFC”) for a domestic initial public offering and its common shares were listed and traded on the Taiwan Stock Exchange (the “TWSE”) on October 27, 2000. Certain of Chunghwa’s common shares were sold, in connection with the foregoing privatization plan, in domestic public offerings at various dates from August 2000 to July 2003. Certain of Chunghwa’s common shares were also sold in an international offering of securities in the form of American Depositary Shares (“ADS”) on July 17, 2003 and were listed and traded on the New York Stock Exchange (the “NYSE”). The MOTC sold common shares of Chunghwa by auction in the ROC on August 9, 2005 and completed the second international offering on August 10, 2005. Upon completion of the share transfers associated with these offerings on August 12, 2005, the MOTC owned less than 50% of the outstanding shares of Chunghwa and completed the privatization plan.

Chunghwa together with its subsidiaries are hereinafter referred to collectively as the “Company”.

The financial statements are presented in Chunghwa’s functional currency, New Taiwan dollars.

2. APPROVAL OF FINANCIAL STATEMENTS

The consolidated financial statements were approved and authorized for issue by the Board of Directors on February 13, 2015.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Statement of Compliance

The accompany consolidated financial statements have been prepared in conformity with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), the International Financial Reporting Interpretations Committee (IFRIC) and SIC Interpretations (SIC) endorsed by the Financial Supervisory Commission (FSC) (the “Taiwan-IFRS”).

Basis of Preparation

The consolidated financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at revalued amounts or fair values, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for assets.

Current and Noncurrent Assets and Liabilities

Current assets include:

- a. Assets held primarily for the purpose of trading;
- b. Assets expected to be realized within twelve months after the reporting period; and
- c. Cash and cash equivalents unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

Current liabilities include:

- a. Liabilities held primarily for the purpose of trading;
- b. Liabilities due to be settled within twelve months after the reporting period; and
- c. Liabilities for which the Company does not have an unconditional right to defer settlement for at least twelve months after the reporting period.

Assets and liabilities that are not classified as current are classified as non-current.

Light Era Development Co., Ltd. (LED) engages mainly in development of property for rent and sale. The assets and liabilities of LED related to property development within its operating cycle, which is over one year, are classified as current items.

Basis of Consolidation

- a. Principles for preparing consolidated financial statements

The consolidated financial statements incorporate the financial statements of Chunghwa and entities controlled by the Chunghwa (its subsidiaries).

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies in line with those used by the Company.

All intra-company transactions, balances, income and expenses are eliminated in full upon consolidation.

Attribution of total comprehensive income to noncontrolling interests

Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Changes in the Company's ownership interests in subsidiaries

Changes in the Company's ownership interests in subsidiaries that do not result in the Company losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the

Company's interests and the noncontrolling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the noncontrolling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to owners of the parent.

(Concluded)

- 1) The Company owns approximately 28% equity shares of SENAO. However, the Company has four out of seven seats of the board of directors of SENAO through the support of large beneficial shareholders. Therefore, the Company has control over SENAO and the accounts of SENAO are included in the consolidated financial statements.
- 2) The Company's equity ownership of CHIEF decreased from 73.02% to 72.51% as of December 31, 2014 due to CHIEF issued employee stock bonus in July 2014.
- 3) Chunghwa established 100% owned subsidiary of Honghwa Human Resources in January 2013. Honghwa Human Resources changed its name to Honghwa International from July 4, 2014.
- 4) LED merged YYRP by absorption in October 2014.
- 5) The decrease of the Company's equity ownership of CHPT was due to the exercise of options by CHPT's employees and CHPT issued employee stock bonus. CHI did not participate in the capital increase of CHPT in August and September 2014 and the ownership interest decreased after the capital increase of CHPT. The Company owned 50.62% and 47.65% equity shares of CHPT as of December 31, 2013 and December 31, 2014, respectively. However, the Company has three out of five seats of the board of directors of CHPT. Therefore, the Company has control over CHPT and the accounts of CHPT are included in the consolidated financial statements.
- 6) CHPT established 100% owned subsidiary of CHPT (JP) in January 2013.
- 7) CHPT established 100% owned subsidiary of CHPT (International) in July 2013.
- 8) CHPT (International) established 100% owned subsidiary of STET.

The following diagram presents information regarding the relationship and ownership percentages between Chunghwa and its subsidiaries as of December 31, 2014:

Business Combination

Acquisitions of businesses are accounted for using the acquisition method. Acquisition-related costs are recognized in profit or loss as incurred.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any noncontrolling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed.

Foreign Currencies

In preparing the financial statements of each individual entity, transactions in currencies other than the entity's functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions.

At the end of each balance sheet date, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Exchange differences on monetary items arising from settlement or translation are recognized in profit or loss in the period in which they arise.

Non-monetary items measured at fair value that are denominated in foreign currencies are retranslated at the date when the fair value was determined and related exchange differences are recognized in profit or loss. Conversely, when the fair value changes were recognized in other comprehensive income, related exchange difference shall be recognized in other comprehensive income.

Non-monetary items that are measured at historical cost in a foreign currency are not retranslated.

For the purposes of presenting financial statements, the assets and liabilities of the Company's foreign operations (including of the subsidiaries in other countries or currencies used different with Chungwa) are translated into New Taiwan dollars using exchange rates prevailing at the end of each reporting period. Income and expense items are translated at the average exchange rates for the period. Exchange differences arising, if any, are recognized in other comprehensive income and accumulated in equity attributed to noncontrolling interests as appropriate.

Cash Equivalents

Cash equivalents include commercial paper, time deposits and negotiable certificate of deposit with original maturities within three months from the date of acquisition, highly liquid, readily convertible to a known amount of cash and be subject to an insignificant risk of changes in value. These cash equivalents are held for the purpose of meeting short-term cash commitments.

Inventories

Inventories are stated at the lower of cost (weighted-average cost) or net realizable value item by item, except for those that may be appropriate to group items of similar or related inventories. Net realizable value is the estimated selling price of inventories less all estimated costs of completion and costs necessary to make the sale. The calculation of the cost of inventory is derived using the weighted-average method.

Buildings and Lands Consigned to Constructing Firm

Inventories of LED are stated at the lower of cost or net realizable value item by item, except for those that may be appropriate to group as similar items or related inventories. Land acquired before construction is classified as land held for development, and then reclassified as land held under development after LED begins its construction project.

When using the completed-contract method for its construction projects, LED recognizes the proceeds from customers as advances from customers for land and building before the construction project is completed. After completion of the construction project and ownership is transferred to the customers, LED recognizes the relevant revenues.

Investments in Associates and Jointly Controlled Entities

An associate is an entity over which the Company has significant influence and that is neither a subsidiary nor an interest in a joint venture. Joint venture arrangements that involve the establishment of a separate entity in which ventures have joint control over the economic activity of the entity are referred to as jointly controlled entities.

The operating results and assets and liabilities of associates and jointly controlled entities are incorporated in these consolidated financial statements using the equity method of accounting. Under the equity method, an investment in an associate and jointly controlled entity is initially recognized at cost and adjusted thereafter to recognize the Company's share of the profit or loss and other comprehensive income of the associate and jointly controlled entity. The Company also recognizes the changes in the Company's share of equity of associates and jointly controlled entities attributable to the Company.

When the Company subscribes for additional new shares of the associate and jointly controlled entity at a percentage different from its existing ownership percentage, the resulting carrying amount of the investment differs from the amount of the Company's proportionate interest in the associate and jointly controlled entity. The Company records such a difference as an adjustment to investments with the corresponding amount charged or credited to additional paid-in capital. When the adjustment should be debited to additional paid-in capital but the additional paid-in capital recognized from investments accounted for using equity method is insufficient, the shortage is debited to retained earnings.

Any excess of the cost of acquisition over the Company's share of the net fair value of the identifiable assets and liabilities of an associate and jointly controlled entity recognized at the date of acquisition is recognized as goodwill, which is included within the carrying amount of the investment and is not amortized. Any excess of the Company's share of the net fair value of the identifiable assets and liabilities over the cost of acquisition, after reassessment, is recognized immediately in profit or loss.

The entire carrying amount of the investment (including goodwill) is tested for impairment as a single asset by comparing its recoverable amount with its carrying amount. Any impairment loss recognized forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognized to the extent that the recoverable amount of the investment subsequently increases.

When the Company transacts with its associate and jointly controlled entity, profits and losses resulting from the transactions with the associate and jointly controlled entity are recognized in the Company's consolidated financial statements only to the extent of interests in the associate and jointly controlled entity that are not related to the Company.

Property, Plant and Equipment

Property, plant and equipment are initially measured at cost and subsequently measured at cost less accumulated depreciation and accumulated impairment loss.

Depreciation is recognized using the straight-line method. Each significant part is depreciated separately. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Any gain or loss arising on the disposal of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in profit or loss.

Investment Properties

Investment properties are properties held to earn rentals and/or for capital appreciation (including property under construction for such purposes). Investment properties also include land held for a currently undetermined future use.

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are measured at cost less accumulated depreciation and accumulated impairment loss. Depreciation is recognized using the straight-line method.

Any gain or loss arising on derecognition of the investment properties is calculated as the difference between the net disposal proceeds and the carrying amount of the asset and is included in profit or loss in the period in which the property is derecognized.

Goodwill

Goodwill arising from the acquisition of a business is carried at cost as established at the date of acquisition of the business less accumulated impairment loss.

For the purpose of impairment testing, goodwill is allocated to each of the Company's cash-generating units or groups of cash-generating units that are expected to benefit from the synergies of the business combination.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired, by comparing its carrying amount, including the attributable goodwill, with its recoverable amount. However, if the goodwill allocated to a cash-generating unit was acquired in a business combination during the current annual period, that unit shall be tested for impairment before the end of the current annual period. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss is recognized directly in profit or loss. An impairment loss recognized for goodwill is not reversed in subsequent periods.

Intangible Assets Other Than Goodwill

Intangible assets with finite useful lives that are acquired separately are initially measured at cost and subsequently measured at cost less accumulated amortization and accumulated impairment loss. Amortization is recognized on a straight-line basis. The estimated useful life, residual value, and amortization method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis. The residual value of an intangible asset with a finite useful life shall be assumed to be zero unless the Company expects to dispose of the intangible asset before the end of its economic life.

Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, and are recognized in profit or loss when the asset is derecognized. Intangible assets with indefinite useful lives that are acquired separately are measured at cost less accumulated impairment loss.

Impairment of Tangible and Intangible Assets Other Than Goodwill

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets, excluding goodwill, to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs to sell and value in use. If the recoverable amount of an asset or cash-generating unit is estimated to be less than its carrying amount, the carrying amount of the asset or cash-generating unit is reduced to its recoverable amount.

When an impairment loss is subsequently reversed, the carrying amount of the asset or cash-generating unit is increased to the revised estimate of its recoverable amount, but only to the extent of the carrying amount that would have been determined had no impairment loss been recognized for the asset or cash-generating unit in prior years. A reversal of an impairment loss is recognized in profit or loss.

Financial Instruments

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss.

a. Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis.

1) Measurement category

a) Financial assets at fair value through profit and loss (FVTPL)

Financial assets are classified as at FVTPL when the financial asset is either held for trading or it is designated as at FVTPL.

Financial assets at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognized in profit or loss. The net gain or loss recognized in profit or loss does not incorporate any dividend or interest earned on the financial asset.

b) Held-to-maturity financial assets

The Company invests in bank debentures and corporate bonds over specific credit ratings and the Company has positive intent and ability to hold to maturity, are classified as held-to-maturity investments.

Subsequent to initial recognition, held-to-maturity financial assets are measured at amortized cost using the effective interest method less any impairment.

c) Available-for-sale financial assets (AFS financial assets)

AFS financial assets are non-derivatives that are either designated as AFS or are not classified as loans and receivables, held-to-maturity financial assets or financial assets at fair value through profit or loss.

Listed stocks, emerging market stocks and unlisted stocks held by the Company and classified as AFS in an active market are measured at fair value at the end of each reporting period. AFS equity investments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured are carried at cost less any identified impairment losses at the end of each reporting period. If, in a subsequent period, the fair value of the financial assets can be reliably measured, the financial assets are remeasured at fair value. The difference between the carrying amount and the fair value is recognized in other comprehensive income. Any impairment losses are recognized in profit or loss.

AFS financial assets are measured at fair value. Changes in the carrying amount of AFS monetary financial assets relating to changes in foreign currency exchange rates, interest income calculated using the effective interest method and dividends on AFS equity investments are recognized in profit or loss. Other changes in the carrying amount of AFS financial assets are recognized in other comprehensive income and will be reclassified to profit or loss when the investment is disposed of or is determined to be impaired.

Dividends on AFS equity instruments are recognized in profit or loss when the Company's right to receive the dividends is established.

d) Loans and receivables

Loans and receivables (including cash and cash equivalent, trade receivables, accounts receivable from related parties, other financial assets and refundable deposits) are measured at amortized cost using the effective interest method, less any impairment, except for short-term receivables when the effect of discounting is immaterial.

2) Impairment of financial assets

Financial assets, other than those at FVTPL, are assessed for indicators of impairment at the end of each reporting period. Financial assets are considered to be impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been affected.

For financial assets carried at amortized cost, assets that are assessed not to be impaired individually are, in addition, assessed for impairment on a collective basis.

For financial assets carried at amortized cost, the amount of the impairment loss recognized is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate.

For financial assets measured at amortized cost, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortized cost would have been had the impairment not been recognized.

For AFS equity investments, a significant or prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment.

When an AFS financial asset is considered to be impaired, cumulative gains or losses previously recognized in other comprehensive income are reclassified to profit or loss in the period.

In respect of AFS equity securities, impairment loss previously recognized in profit or loss are not reversed through profit or loss. Any increase in fair value subsequent to an impairment loss is recognized in other comprehensive income. In respect of AFS debt securities, the impairment loss is subsequently reversed through profit or loss if an increase in the fair value of the investment can be objectively related to an event occurring after the recognition of the impairment loss.

For financial assets that are carried at cost, the amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment loss will not be reversed in subsequent periods.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade receivables and other receivables, where the carrying amount is reduced through the use of an allowance account. When a trade receivable and other receivables are considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognized in profit or loss except for uncollectible trade receivables and other receivables that are written off against the allowance account.

3) Derecognition of financial assets

The Company derecognizes a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognized in other comprehensive income is recognized in profit or loss.

b. Financial liabilities

1) Subsequent measurement

Except for financial liabilities at FVTPL, all the financial liabilities are measured at amortized cost using the effective interest method.

2) Derecognition of financial liabilities

The difference between the carrying amount of the financial liability derecognized and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

c. Derivative financial instruments

The Company enters into a variety of derivative financial instruments to manage its exposure to foreign exchange rate risks, including cross currency swap contract and foreign exchange forward contracts.

Derivatives are initially recognized at fair value at the date the derivative contracts are entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognized in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship. When the fair value of derivative financial instruments is positive, the derivative is recognized as a financial asset; when the fair value of derivative financial instruments is negative, the derivative is recognized as a financial liability.

Hedge Accounting

The Company designates derivatives instruments as cash flow hedges. Hedges of foreign exchange risk on firm commitments are accounted for as cash flow hedges.

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognized in other comprehensive income. The gain or loss relating to the ineffective portion is recognized immediately in profit or loss.

The associated gains or losses that were recognized in other comprehensive income are reclassified from equity to profit or loss as a reclassification adjustment in the line item relating to the hedged item in the same period when the hedged item affects profit or loss. If a hedge of a forecast transaction subsequently results in the recognition of a non-financial asset or a non-financial liability, the associated gains and losses that were recognized in other comprehensive income are removed from equity and are included in the initial cost of the non-financial asset or non-financial liability.

Hedge accounting is discontinued prospectively when the Company revokes the designated hedging relationship, or when the hedging instrument expires or is sold, terminated, or exercised, or when it no longer meets the criteria for hedge accounting. The cumulative gain or loss on the hedging instrument that has been previously recognized in other comprehensive income from the period when the hedge was effective remains separately in equity until the forecast transaction occurs. When a forecast transaction is no longer expected to occur, the gain or loss accumulated in equity is recognized immediately in profit or loss.

Provisions

Provisions for the expected cost of warranty obligations are recognized at the date of sale of the relevant products, at the best estimate of the expenditure required to settle the Company's obligation by the management of the Company.

Revenue Recognition

Revenue from the sale of goods is recognized when all the following conditions are satisfied:

- a. The Company has transferred to the buyer the significant risks and rewards of ownership of the goods;
- b. The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- c. The amount of revenue can be measured reliably;
- d. It is probable that the economic benefits associated with the transaction will flow to the Company; and
- e. The costs incurred or to be incurred in respect of the transaction can be measured reliably.

Services revenue is recognized when service provided.

Revenue is measured at the fair value of the consideration received or receivable and represents amounts for goods sold in the normal course of business, net of sales discounts and volume rebates. For trade receivables due within one year from the balance sheet date, as the nominal value of the consideration to be received approximates its fair value and transactions are frequent, fair value of the consideration is not determined by discounting all future receipts using an imputed rate of interest.

Usage revenues from fixed-line services (including local, domestic long distance and international long distance), cellular services, Internet and data services, and interconnection and call transfer fees from other telecommunications companies and carriers are billed in arrears and are recognized based upon seconds or minutes of traffic processed when the services are provided in accordance with contract terms.

Other revenues are recognized as follows: (a) one-time subscriber connection fees (on fixed-line services) are deferred and recognized over the average expected customer service periods, (b) monthly fees (on fixed-line services, mobile, Internet and data services) are accrued every month, and (c) prepaid services (fixed-line, mobile, Internet and data services) are recognized as income based upon actual usage by customers or when the right to use those services expires.

Where the Company enters into transactions which involve both the provision of air time bundled with products such as 3G data card and handset, total consideration received from products and air time in these arrangements are allocated and measured using units of accounting within the arrangement based on their relative fair values limited to the amount that is not contingent upon the delivery of products.

Revenue from a contract to provide services is recognized by reference to the stage of completion of the contract.

Dividend income from investments is recognized when the shareholder's right to receive payment has been established. Under the premises that there is much chance economic benefit related to the transactions will flow to the Company and that the revenue can be reasonably measured.

Interest income from a financial asset is recognized when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable.

Leasing

a. The Company as lessor

Rental income from operating leases is recognized on a straight-line basis over the term of the relevant lease.

b. The Company as lessee

Operating lease payments are recognized as an expense on a straight-line basis over the lease term.

Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Other than stated above, all other borrowing costs are recognized in profit or loss in the period in which they are incurred.

Retirement Benefit Costs

Payments to defined contribution retirement benefit plans are recognized as an expense when employees have rendered service entitling them to the contributions.

For defined benefit retirement benefit plans, the cost of providing benefits is determined using the Projected Unit Credit Method. All actuarial gains and losses on the defined benefit obligation are recognized immediately in other comprehensive income. Past service cost is recognized immediately to the extent that the benefits are already vested, and otherwise is amortized on a straight-line basis over the average period until the benefits become vested.

The retirement benefit obligation recognized in the consolidated balance sheets represents the present value of the defined benefit obligation as adjusted for unrecognized past service cost, and as reduced by the fair value of plan assets. Any asset resulting from this calculation is limited to the unrecognized past service cost, plus the present value of available refunds and reductions in future contributions to the plan.

Curtailment or settlement gains or losses on the defined benefit plan are recognized when the curtailment or settlement occurs.

Share-based Payment Arrangements - Employee Stock Options

Equity-settled share-based payments to employees are measured at the fair value of the equity instruments at the grant date.

The fair value determined at the grant date of the employee share options is expensed on a straight-line basis over the vesting period, based on the Company's estimate of employee share options that will eventually vest, with a corresponding increase in additional paid-in capital - employee share options. The fair value determined at the grant date of the employee share options is recognized as an expense in full at the grant date when the share options granted vest immediately.

At the end of each reporting period, the Company reviews its estimate of the number of employee share options expected to vest. The impact of the revision of the original estimates is recognized in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to additional paid-in capital - employee stock options.

Income Tax

Income tax expense represents the sum of the tax currently payable and deferred tax.

a. Current tax

According to the Income Tax Law, an additional tax at 10% of unappropriated earnings is provided for as income tax in the year the shareholders approve to retain the earnings.

Adjustments of prior years' tax liabilities are added to or deducted from the current year's tax provision.

b. Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences, loss carryforwards, unused tax credits from purchases of machinery equipment and technology and research and development expenditures

Deferred tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries and associates, and interests in joint ventures, except where the Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognized to the extent that it is probable that there will be

sufficient taxable profits against which to utilize the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. A previously unrecognized deferred tax asset is also reviewed at the end of each reporting period and recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

c. Current and deferred tax for the year

Current and deferred tax are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income, in which case, the current and deferred tax are also recognized in other comprehensive income.

4. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY AND ASSUMPTION

In the application of the Company's accounting policies, the managements are required to make judgments, estimates and assumptions which are based on historical experience and other factors that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period. Actual results may differ from these estimates.

a. Impairment of accounts receivable

When there is objective evidence showed indications of impairment, the Company will considered the estimation of future cash flows. The amount of impairment will be measured on the difference between the carrying amount and the present value of estimated future cash flows discounted by the original effective interest rates of the financial assets. However, the impact from the discount of short-term receivables is not material, the impairment of short-term receivables is measured at the difference between the carrying amount and the estimated future cash flows. Where the actual future cash flows are less than expected, a material impairment loss may arise.

b. Provision for inventory valuation and obsolescence

Inventories are stated at the lower of cost or net realizable value. Net realizable value is calculated as the final selling price minus the estimated selling costs. Comparison of net realizable value and cost is determined on an item by item basis, except those similar items which could be categorized into the same groups. The Company uses the inventory holding period and turnover as the evaluation basis for inventory obsolescence losses.

c. Impairment of tangible and intangible assets

When an indication of impairment is assessed with objective evidence, the impairment is recognized in profit or loss as incurred. The estimate of recoverable amount would impact on the timing and the amount of impairment loss recognition.

d. Useful lives of property, plant and equipment

As discussed in Note 3, "Summary of Significant Accounting Policies" "Property, Plant and Equipment", the Company reviewed estimated useful lives of property, plant and equipment at the end of each year.

e. Recognition and measurement of defined benefit plans

Accrued pension liabilities and the resulting pension expense under defined benefit pension plans are calculated using the Projected Unit Credit Method. Actuarial assumptions comprise the discount rate, rate of employee turnover, and long-term average future salary increase. Changes in economic circumstances and market conditions will affect these assumptions and may have a material impact on the amount of the expense and the liability.

5. APPLICATION OF NEW AND REVISED STANDARDS AND INTERPRETATIONS

a. The Guidelines Governing the Preparation of Financial Reports by Securities Issuers and the 2013 Taiwan-IFRSs version in issue but not yet effective.

On April 3, 2014, according to Rule No. 1030029342 and Rule No. 1030010325 issued by the FSC, the following 2013 IFRS version endorsed by the FSC (collectively, "2013 Taiwan-IFRSs version") and the related amendments to the Guidelines Governing the Preparation of Financial Reports by Securities Issuers should be adopted by the Company starting 2015.

(Concluded)

Note: Unless stated otherwise, the above new, revised or amended standards or interpretations are effective for annual periods beginning on or after the respective effective dates.

Except for the following, the application of aforementioned 2013 Taiwan-IFRSs version and the related amendments to the Guidelines Governing the Preparation of Financial Reports by Securities Issuers will not have any material impact on the Company's consolidated financial statements:

1) IFRS 12 "Disclosure of Interests in Other Entities"

IFRS 12 is a new disclosure standard and is applicable to entities that have interests in subsidiaries, joint arrangements, associates and/or unconsolidated structured entities. In general, the disclosure requirements in IFRS 12 are more extensive than in the current standards. The Company will apply the new disclosure requirements of IFRS 12 in 2015.

2) IFRS 13 "Fair Value Measurement"

IFRS 13 establishes a single source of guidance for fair value measurements and related disclosures. It defines fair value, establishes a framework for measuring fair value, and requires disclosures about fair value measurements. The disclosure requirements in IFRS 13 are more extensive than those required in the current standards. For example, quantitative and qualitative disclosures based on the three-level fair value hierarchy currently required for financial instruments only will be extended by IFRS 13 to cover all assets and liabilities within its scope.

The Company will apply IFRS 13 prospectively in 2015.

3) Amendments to IAS 1 "Presentation of Items of Other Comprehensive Income"

The amendments to IAS 1 require items of other comprehensive income to be grouped into those that (1) will not be reclassified to profit or loss; and (2) will be reclassified subsequently to profit or loss when specific conditions are met. Income taxes on related items of other comprehensive income are grouped on the same basis. Previously, there were no such requirements.

The Company will apply the amendments to IAS 1 in 2015. The items that will not be reclassified subsequently to profit or loss are expected to include actuarial gains or losses from defined benefit plans, the share of actuarial gains or losses from defined benefit plans of associates and jointly controlled entities as well as the related income tax on such items. Items that will be reclassified subsequently to profit or loss are expected to include exchange differences arising on translation of foreign operations, changes in fair value of available-for-sale financial assets, cash flow hedges, the share of other comprehensive income of associates and jointly controlled entities as well as the related income tax on items of other comprehensive income (except for the share of actuarial gains or losses from defined benefit plans of associates and jointly controlled entities). However, the application of the above amendments will not result in any impact on the net income, other comprehensive income, net of tax and total comprehensive income for the year ended December 31, 2014.

4) Amendments to IAS 19 “Employee Benefits”

The amendments to IAS 19 change the accounting for defined benefit plans, which require the Company to recognize changes in defined benefit obligations or assets and to disclose the components of the defined benefit costs. According to the amendments, the past service cost, will be expensed immediately when it incurs and no longer be amortized over the average period before vested on a straight-line basis. In addition, the revised IAS 19 introduces certain changes in the presentation of the defined benefit cost, and also includes more extensive disclosures.

When the Company applies the amendments to IAS 19 in 2015, employee benefits will be recognized based on actuarial calculations in accordance with IAS 19. The Company anticipates that as of December 31, 2014 and January 1, 2014, deferred tax assets will be retrospectively adjusted to decrease by \$5,220 thousand and \$6,103 thousand, respectively; accrued pension liabilities will be retrospectively adjusted to decrease by \$30,708 thousand and \$35,898 thousand, respectively; retained earnings will be retrospectively adjusted to increase by \$21,920 thousand and \$26,040 thousand, respectively; noncontrolling interests will be retrospectively adjusted to increase by \$3,568 thousand and \$3,755 thousand, respectively. For the year ended December 31, 2014 pension cost will increase by \$5,190 thousand in operating expenses, and income tax expenses will decrease by \$883 thousand.

b. The IFRSs issued by IASB but not endorsed by FSC

The Company has not applied the following IFRSs issued by the IASB but not endorsed by the FSC. As of the date that the consolidated financial statements were authorized for issue, the initial adoption to the following standards and interpretations is still subject to the effective date to be published by the FSC.

Amendment to IAS 39	Novation of Derivatives and Continuation of Hedge Accounting January 1, 2014
IFRIC 21	Levies January 1, 2014

(Concluded)

Note 1: Unless stated otherwise, the above new standards and interpretations are effective for annual periods beginning on or after the respective effective dates.

Note 2: The amendment to IFRS 2 applies to share-based payment transactions for which the grant date is on or after July 1, 2014; the amendment to IFRS 3 applies to business combinations for which the acquisition date is on or after July 1, 2014; the amendment to IFRS 13 is effective immediately; the remaining amendments are effective for annual periods beginning on or after July 1, 2014.

Note 3: Except the amendment to IFRS 5 is applied prospectively, to changes in a method of disposal that occur in annual periods beginning on or after January 1, 2016, the remaining amendments are effective for annual periods beginning on or after January 1, 2016.

Note 4: Prospectively applicable to transactions occurring in annual periods beginning on or after January 1, 2016.

Except for the following, the initial application of the above new standards and interpretations will not have any material impact on the Company's consolidated financial statements:

1) IFRS 9 "Financial Instruments"

Recognition and measurement of financial assets

With regards to financial assets, all recognized financial assets that are within the scope of IAS 39 "Financial Instruments: Recognition and Measurement" are subsequently measured at amortized cost or fair value. Under IFRS 9, the requirement for the classification of financial assets is stated below.

For the Company's debt instruments that have contractual cash flows that are solely payments of principal and interest on the principal amount outstanding, their classification and measurement are as follows:

- a) For debt instruments, if they are held within a business model whose objective is to collect the contractual cash flows, the financial assets are measured at amortized cost and are assessed for impairment continuously with impairment loss recognized in profit or loss, if any. Interest revenue is recognized in profit or loss by using the effective interest method.
- b) For debt instruments, if they are held within a business model whose objective is achieved by both the collecting of contractual cash flows and the selling of financial assets, the financial assets are measured at fair value through other comprehensive income (FVTOCI) and are assessed for impairment. Interest revenue is recognized in profit or loss by using the effective interest method, and other gain or loss shall be recognized in other comprehensive income, except for impairment gains or losses and foreign exchange gains and losses. When the debt instruments are derecognized or reclassified, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss.

Except for above, all other financial assets are measured at fair value through profit or loss. However, the Company may make an irrevocable election to present subsequent changes in the fair value of an equity investment (that is not held for trading) in other comprehensive income, with only dividend income generally recognized in profit or loss. No subsequent impairment assessment is required, and the cumulative gain or loss previously recognized in other comprehensive income cannot be reclassified from equity to profit or loss.

The impairment of financial assets

IFRS 9 requires that impairment loss on financial assets is recognized by using the "Expected Credit Losses Model". The credit loss allowance is required for financial assets measured at amortized cost, financial assets mandatorily measured at FVTOCI, lease receivables, contract assets arising from IFRS 15 "Revenue from Contracts with Customers", certain written loan commitments and financial guarantee contracts. A loss allowance for the 12-month expected credit losses is required for a financial asset if its credit risk has not increased significantly since initial recognition. A loss allowance for full lifetime expected credit losses is required for a financial asset if its credit risk has increased significantly since initial recognition and is not low. However, a loss allowance for full lifetime expected credit losses is required for trade receivables that do not constitute a financing transaction.

For purchased or originated credit-impaired financial assets, the Company takes into account the expected credit losses on initial recognition in calculating the credit-adjusted effective interest rate. Subsequently, any changes in expected losses are recognized as a loss allowance with a corresponding gain or loss recognized in profit or loss.

Hedge accounting

The main changes in hedge accounting amended the application requirements for hedge accounting to better reflect the entity's risk management activities. Compared with IAS 39, the main changes include: (1) enhancing types of transactions eligible for hedge accounting, specifically broadening the risk eligible for hedge accounting of non-financial items; (2) changing the way hedging derivative instruments are accounted for to reduce profit or loss volatility; and (3) replacing retrospective effectiveness assessment with the principle of economic relationship between the hedging instrument and the hedged item.

2) Amendment to IAS 36 "Recoverable Amount Disclosures for Non-financial Assets"

In issuing IFRS 13 "Fair Value Measurement", the IASB made consequential amendment to the disclosure requirements in IAS 36 "Impairment of Assets", introducing a requirement to disclose in every reporting period the recoverable amount of an asset or each cash-generating unit. The amendment clarifies that such disclosure of recoverable amounts is required only when an impairment loss has been recognized or reversed during the period. Furthermore, the Company is required to disclose the discount rate used in measurements of the recoverable amount based on fair value less costs of disposal measured using a present value technique.

3) IFRS 15 "Revenue from Contracts with Customers"

IFRS 15 establishes principles for recognizing revenue that apply to all contracts with customers, and will supersede IAS 18 "Revenue", IAS 11 "Construction Contracts" and a number of revenue-related interpretations from January 1, 2017.

When applying IFRS 15, an entity shall recognize revenue by applying the following steps:

- a) Identify the contract with the customer;
- b) Identify the performance obligations in the contract;
- c) Determine the transaction price;
- d) Allocate the transaction price to the performance obligations in the contracts; and
- e) Recognize revenue when the entity satisfies a performance obligation.

When IFRS 15 is effective, an entity may elect to apply this Standard either retrospectively to each prior reporting period presented or retrospectively with the cumulative effect of initially applying this Standard recognized at the date of initial application.

Except for the above impact, as of the date the financial statements were authorized for issue, the Company is continually assessing the possible impact that the application of other standards and interpretations will have on the Company's financial position and operating result, and will disclose the relevant impact when the assessment is complete.

<u>December 31, 2013</u>			
Forward exchange contracts - buy	NT\$/US\$	2014.01	NT\$90,092/US\$3,021

The Company entered into the above forward exchange contracts to manage its exposure to foreign currency risk and impacts in operating results due to fluctuations in exchange rates. However, the aforementioned derivatives did not meet the criteria for hedge accounting and were classified as financial assets or financial liabilities held for trading.

10. TRADE NOTES AND ACCOUNTS RECEIVABLE, NET

	<u>December 31</u>	
	<u>2014</u>	<u>2013</u>
Trade notes and accounts receivable	\$ 27,277,401	\$ 23,823,004
Less: Allowance doubtful accounts	<u>(1,049,402)</u>	<u>(922,102)</u>
	<u>\$ 26,227,999</u>	<u>\$ 22,900,902</u>

The average credit terms range from 30 to 90 days. In determining the recoverability of trade notes and accounts receivable, the Company considers significant change in the credit quality of the trade notes and accounts receivable from the date credit was initially granted up to the end of the reporting period. In general, with few exceptional cases, it is unlikely for the notes and accounts receivable due longer than 180 days to be collected, therefore the Company recognized 100% allowance of notes and accounts receivable overdue longer than 180 days. For the notes and accounts receivable less than 180 days, the allowance for doubtful accounts was estimated based on the Company's historical recovery experience.

The Company serves a large consumer base; therefore, the concentration of credit risk is limited.

The aging of estimated recoverable amount of receivables that were past due but not impaired as of December 31, 2014 and 2013 was as follows:

	<u>December 31</u>	
	<u>2014</u>	<u>2013</u>
Less than 30 days	\$ 114,155	\$ 132,130

More than 181 days	<u>16,768</u>	<u>11,617</u>
	<u>\$ 190,579</u>	<u>\$ 285,917</u>

The above aging analysis was based on days overdue.

Chunghwa participated in the capital increase of So-net by investing \$60,000 thousand in March 2013. The ownership interest remains 30% after the capital increase.

Chunghwa did not participate in the capital increase of KWT in August and November 2014 and the ownership interest decreased from 33% to 27% after the capital increase of KWT.

Chunghwa and Taiwan International Ports Corporation, Ltd. established TIPL in October, 2014. Chunghwa invested \$80,000 thousand cash and held 27% ownership of TIPL. TIPL engages mainly in logistics service of increasing cargo movement efficiency.

Chunghwa, President Chain Store Corporation and EasyCard Corporation established DZIM in May 2011. DZIM reduced its capital to offset the deficits amounting to \$130,787 thousand and made capital reduction of \$49,158 thousand during its stockholders' meeting held on March 31, 2013. Chunghwa received \$16,387 thousand from the capital reduction. Chunghwa did not participate in the capital increase of DZIM in July 2013 and the ownership interest decreased from 33% to 13% after the capital increase of DZIM. Chunghwa participated in the capital increase of DZIM by investing \$49,485 thousand in April and June 2014. SENA O participated in the capital increase of DZIM by investing \$24,000 thousand in April 2014. As of December 31, 2014, the Company held 26% ownership of DZIM. DZIM engages mainly in information technology service and general advertisement service.

Chunghwa International Yellow Pages participated in the capital increase of ClickForce Co. by investing \$39,000 thousand and held 49% ownership in December 2014. ClickForce Co. engages mainly in advertisement services.

Chunghwa, Taiwan Mobile Corporation, Asia Pacific Telecom, Vibo Telecom, EasyCard Corporation and Far EasTone Telecommunications established an associate, ADT, in November 2013. Chunghwa invested \$30,000 thousand cash and held 19% ownership of ADT. Based on the share of capital commitments, Chunghwa has one seat out of five seats in the board of directors; therefore it has significant influence over ADT. Chunghwa did not participate in the capital increase of ADT in April 2014 and the ownership interest decreased from 19% to 13% after the capital increase of ADT. Chunghwa still has one seat out of five seats in the board of directors; therefore it remains an investor with significant influence over ADT. ADT engages mainly in the development of mobile payments and information processing service.

Prime Asia participated in the capital increase of MeWorks (HK) by investing \$10,000 thousand and held 20% ownership in May 2014. Based on the share of capital commitments, Prime Asia has two seats out of five seats in the board of directors; therefore it has significant influence over MeWorks. MeWorks engages mainly in investment business.

The Company's share of profit (loss) and other comprehensive income (loss) of investees was recognized based on the audited financial statements for the years ended December 31, 2014 and 2013.

For long-term business development, Chunghwa participated in mobile broadband license (4G license) bidding process announced by NCC and obtained certain spectrums. Chunghwa paid the 4G concession fee amounting to \$39,075,000 thousand in November 2013.

Except for goodwill, the amortization expense is computed using the straight-line method over the following estimated service lives:

The concession fee is amortized on a straight-line basis from the date operations commence through the date the license expires.

The computer software is amortized using the straight-line method over the estimated useful lives of 1 to 10 years.

Other intangible assets are amortized using the straight-line method over the estimated useful lives of 3 to 20 years. Goodwill is not amortized.

After evaluation, the Company does not recognize impairment loss on goodwill in 2014.

The Company recognized an impairment loss of \$18,055 thousand on the goodwill arising from the business combination of a subsidiary, CHI, due to CHI underwent organization downsizing for the year ended December 31, 2013.

20. HEDGING DERIVATIVE LIABILITIES

	December 31, 2014	December 31, 2013
Cash flow hedge - forward exchange contracts	<u>\$ 283</u>	<u>\$ -</u>

The Company's hedge strategy is to enter forward exchange contracts - buy to avoid its foreign currency exposure to certain foreign currency denominated payments in the following six months. In addition, the Company's management considers the market condition to determine the hedge ratio, and enters into forward exchange contracts with the banks to avoid the foreign currency risk.

The Company signed equipment purchase contracts with suppliers, and entered into foreign exchange forward contracts to avoid foreign currency risk exposure to Euro-denominated purchase commitments. Those foreign exchange forward contracts were designated as cash flow hedges. For the year ended December 31, 2014, loss arising from changes in fair value of the hedged items recognized in other comprehensive income was \$283 thousand. Upon the completion of the purchase transaction, the amount deferred and recognized in equity initially will be reclassified into equipment as its carrying value.

The outstanding foreign exchange forward contracts at the balance sheet date were as follows:

	Currency	Maturity Period	Contract Amount (Thousands)
<u>December 31, 2014</u>			
Forward exchange contracts - buy	EUR/NT\$	2015.3	EUR2,341/NT\$90,509

The Company did not have any outstanding forward exchange contracts applied to hedge accounting for the year ended December 31, 2013

Losses arising from the hedging derivative instruments reclassified from equity to initial cost of the non-financial asset in 2014 were \$18,435.

- a. The provision for warranty claims represents the present values of the management's best estimate of the future outflow of economic benefits that will be required under the Company's obligation for warranties in sales agreements. The estimate has been made based on the historical warranty experience.
- b. The provision for employee benefits represents vested long-term service leave entitlements accrued.

26. ADVANCE RECEIPTS

Advance receipts are mainly from advance telecommunication charges. In accordance with NCC's regulation named "Mandatory and Prohibitory Provisions To Be Included In Standard Contracts for Telecommunication Goods (Services) Coupons", the Company entered into a contract with Bank of Taiwan to provide a performance guarantee for advance receipts from selling prepaid cards, as of December 31, 2014 amounting to \$1,022,396 thousand.

27. RETIREMENT BENEFIT PLANS

- a. Defined contribution plans

The pension plan under the Labor Pension Act of ROC (the "LPA") is considered as a defined contribution plan. Based on the LPA, Chunghwa and its domestic subsidiaries make monthly contributions to employees' individual pension accounts at 6% of monthly salaries and wages. Its foreign subsidiaries would make monthly contributions based on the local pension requirements.

- b. Defined benefit plans

Chunghwa completed privatization plans on August 12, 2005. Chunghwa is required to pay all accrued pension obligations including service clearance payment, lump sum payment under civil service plan, additional separation payments, etc. upon the completion of the privatization in accordance with the Statute Governing Privatization of Stated-owned Enterprises. After paying all pension obligations for privatization, the plan assets of Chunghwa should be transferred to the Fund for Privatization of Government-owned Enterprises (the "Privatization Fund") under the Executive Yuan. On August 7, 2006, Chunghwa transferred the remaining balance of fund to the Privatization Fund. However, according to the instructions of MOTC, Chunghwa was requested to administer the distributions to employees for pension obligations including service clearance payment, lump sum payment under civil service plan, additional separation payments, etc. upon the completion of the privatization and recognized in other current monetary assets.

The Company's pension plan is considered as a defined benefit plan under the Labor Standards Law that provide benefits based on an employee's length of service and average six-month salary prior to retirement. Chungwa and its subsidiaries contribute an amount no more than 15% of salaries paid each month to their respective pension funds (the Funds), which are administered by the Labor Pension Fund Supervisory Committee (the Committee) and deposited in the names of the Committees in the Bank of Taiwan.

Under the Labor Standards Law, the rate of return on assets shall not be less than the average interest rate on a two-year time deposit published by the local banks and the government is responsible for any shortfall in the event that the rate of return is less than the required rate of return. The plan assets are held in a commingled fund which is operated and managed by the government's designated authorities; as such, the Company does not have any right to intervene in the investments of the funds.

The most recent actuarial valuation of plan assets and the present value of the defined benefit obligation were carried out by the independent actuary.

The principal assumptions used for the purpose of the actuarial valuations were as follows:

	<u>Measurement Date</u>	
	<u>December 31</u>	
	2014	2013
Discount rates	2.00%	2.00%
Expected return on plan assets	2.00%	2.00%
Expected rates of salary increase	1.00%-2.00%	1.00%-2.75%

The expected rate of return was based on historical return trends and analysts' predictions of the market where the plan assets located over the life of the related obligation, by reference to the aforementioned use of the plan assets and the impact of the related minimum return.

Amounts recognized in profit or loss in respect of these defined benefit plans were as follows:

	<u>Year Ended December 31</u>

The issued common stock has a par value of \$10 per share and entitles the holder the right to vote and receive dividends.

2) Global depositary receipts

For the purpose of privatizing Chunghwa, the MOTC sold 1,109,750 thousand common shares of Chunghwa in an international offering of securities in the form of American Depositary Shares ("ADS") amounting to 110,975 thousand units (one ADS represents ten common shares) on the

New York Stock Exchange on July 17, 2003. Afterwards, the MOTC sold 1,350,682 thousand common shares in the form of ADS amounting to 135,068 thousand units on August 10, 2005. Subsequently, the MOTC and Taiwan Mobile Co., Ltd. sold 505,389 thousand and 58,959 thousand common shares of Chunghwa, respectively, in the form of ADS totally amounting to 56,435 thousand units on September 29, 2006. The MOTC and Taiwan Mobile Co., Ltd. have sold 3,024,780 thousand common shares in the form of ADS amounting to 302,478 thousand units. As of December 31, 2014, the outstanding ADSs were 246,652 thousand common shares, which equaled 24,665 thousand units and represented 3.18% of Chunghwa's total outstanding common shares.

The ADS holders generally have the same rights and obligations as other common stockholders, subject to the provision of relevant laws. The exercise of such rights and obligations shall comply with the related regulations and deposit agreement, which stipulate, among other things, that ADS holders can, through deposit agents:

- a) Exercise their voting rights,
- b) Sell their ADSs, and
- c) Receive dividends declared and subscribe to the issuance of new shares.

Additional paid-in capital may only be utilized to offset deficits. However, the additional paid-in capital from shares issued in excess of par and donations may be distributed in cash or capitalized when a company has no deficit, which however is limited to a certain percentage of Chunghwa's paid-in capital.

Additional paid-in capital from investments accounted for using equity method may not be used for any purpose.

c. Retained earnings and dividends policy

Before distributing a dividend or making any other distribution to stockholders, Chunghwa must pay all outstanding taxes, offset deficits in prior years and set aside a legal reserve equal to 10% of its net income, except when the accumulated amount of such legal reserve equals to the Company's total authorized capital, and depending on its business needs or requirements, may also set aside or reverse special reserves. In accordance with Chunghwa's Articles of Incorporation, no less than 50% of the remaining earnings comprising remaining balance of net income, if any, plus cumulative undistributed earnings shall be distributed in the following order: (a) from 2% to 5% of distributable earnings shall be distributed to employees as employee bonus; (b) no more than 0.2% of distributable earnings shall be distributed to board of directors and supervisors as remuneration; and (c) cash dividends to be distributed shall not be less than 50% of the total amount of dividends to be distributed. If cash dividend to be distributed is less than \$0.10 per share, such cash dividend shall be distributed in the form of common shares.

For the years ended December 31, 2014 and 2013, the accrual amounts for bonuses to employees and remuneration to directors and supervisors were accrued based on past experiences and the probable amount to be paid in accordance with Chunghwa's Articles of Incorporation and Implementation Guidance for the Employee's Bonus Distribution of Chunghwa Telecom Co., Ltd.

If the initial accrual amounts of the aforementioned bonus are significantly different from the amounts proposed by the board of directors, the difference is charged to the earnings of the year making the initial estimate. Otherwise, the difference between initial accrual amount and the amount resolved in the shareholders' meeting is charged to the earnings of the following year as a result of change in accounting estimate. If the shareholders' meeting approved to distribute the employee bonus as stocks, the share number of the stock bonus were determined by the amount of bonus divided by the fair value of the common stocks which was the closing market prices one day before shareholders' meeting after taking into account the effects of ex-rights and ex-dividends.

The Company should appropriate or reverse a special reserve in accordance with Rule No. 1010012865 and Rule No. 1010047490 issued by the FSC and the directive entitled "Questions and Answers on Special Reserves Appropriated Following the Adoption of Taiwan-IFRSs". Distributions can be made out of any subsequent reversal of the debit to other equity items.

The appropriation for legal reserve shall be made until the accumulated reserve equals the aggregate par value of the outstanding capital stock of Chunghwa. This reserve can only be used to offset a deficit, or, when the legal reserve has exceeded 25% of the Chunghwa's paid-in capital, the excess may be transferred to capital or distributed in cash.

Except for non-ROC resident shareholders, all shareholders receiving the dividends are entitled a tax credit equal to their proportionate share of the income tax paid by the Chunghwa.

The appropriations of earnings for 2013 and 2012 had been approved in the stockholders' meetings on June 24, 2014 and June 25, 2013 were as follows:

	Appropriation of Earnings		Dividends Per Share	
	For Fiscal Year 2013	For Fiscal Year 2012	(NT\$)	
			For Fiscal Year 2013	For Fiscal Year 2012
Legal reserve	\$ 2,074,342	\$ 3,990,397		
Special reserve	144,005	-		
Cash dividends	18,525,558	35,913,099	\$ 2.39	\$ 4.63

The stockholders of Chunghwa resolved to distribute cash \$2.14 per share and the total amount of \$16,577,663 thousand from additional paid-in capital on June 24, 2014.

The stockholders of Chunghwa resolved to distribute cash \$0.72 per share and the total amount of \$5,589,240 thousand from additional paid-in capital on June 25, 2013.

The bonuses to the employees and remuneration to the directors and supervisors for 2013 and 2012 approved in the stockholders' meetings on June 24, 2014 and June 25, 2013 were as follows:

	<u>2013</u>	<u>2012</u>
	Cash Bonus	Cash Bonus
Bonus to employees	\$ 758,627	\$ 1,533,082
Remuneration of directors and supervisors	19,304	37,484

The appropriations of earnings for 2012 were proposed according to the Company's financial statements for the year ended December 31, 2012, which were prepared in accordance with the pre-revised Guidelines Governing the Preparation of Financial Reports by Securities Issuers and the Generally Accepted Accounting Standard in the Republic of China ("ROC GAAP"), and by reference to the balance sheet for the year ended December 31, 2012, which was prepared in accordance with the revised Guidelines Governing the Preparation of Financial Reports by Securities Issuers (revised).

There was no difference between the initial accrual amounts and the amounts resolved in shareholders' meeting of the aforementioned bonuses to employees and the remuneration to directors and supervisors.

The appropriations of earnings for 2014 had been proposed by the Chunghwa's board of directors on February 13, 2015. The appropriations and dividends per share were as follows:

	Appropriation of Earnings	Dividends Per Share (NT\$)
Legal reserve	\$ 680,743	
Reversal of special reserve	(144,005)	
Cash dividends	37,673,263	\$4.86

The appropriations of earnings, the bonus to employees, and the remuneration to directors and supervisors for 2014 are subject to the resolution of the shareholders' meeting to be held on June 26, 2015.

Information of the appropriation of the Company's earnings, employees bonuses and remuneration to directors and supervisors proposed by the board of directors and approved by the stockholders is available on the Market Observation Post System website.

- d. Special reserves to be recognized under Rule No. 1010012865 issued by the FSC from the date of transition to Taiwan-IFRSs (January 1, 2012).

The adjustments of Taiwan-IFRSs adoption resulted in the decrease of retained earnings of the Company; therefore, the Company is not required to appropriate any amount to the special reserve.

h. Income tax examinations

Subsidiary Senao's income tax returns have been examined by the tax authorities through 2011. Chunghwa and the following subsidiaries income tax returns have been examined by the tax authorities through 2012: CHPT, CHI, CHST, CHYP, CHIEF, Unigate, SFD, CHSI, LED, YYRP, SHE and CEI.

32. EARNINGS PER SHARE

Net income and weighted average number of common stock used in the calculation of earnings per share were as follows:

Net Income

	<u>Year Ended December 31</u>	
	2014	2013
Net income used to compute the basic earnings per share		
Net income attributable to the parent	\$ 38,616,176	\$ 39,715,693

Employee stock options and bonus of subsidiaries	<u>(386)</u>	<u>(2,560)</u>
Net income used to compute the diluted earnings per share	<u>\$ 38,615,790</u>	<u>\$ 39,713,133</u>

Weighted Average Number of Common Stock

(Thousand Shares)

	<u>Year Ended December 31</u>	
	2014	2013
Weighted average number of common stock used to compute the basic earnings per share	7,757,447	7,757,447
Assumed conversion of all dilutive potential common stock

Weighted average number of common stock used to compute the diluted earnings per share	<u>7,769,786</u>	<u>7,769,906</u>

If Chunghwa may settle the employee bonus in shares or cash at the entity's option, the entity shall presume that it will be settled in shares and takes those shares into consideration when calculating the weighted average number of outstanding shares used in the calculation of diluted EPS if the shares have a dilutive effect. The dilutive effect of the shares needs to be considered until the stockholders resolve the number of shares to be distributed to employees in their meeting in the following year.

33. SHARE-BASED PAYMENT ARRANGEMENT

a. SENAO share-based compensation plans

SENAO share-based compensation plans ("SENAO Plans") described as follows:

Effective Date	Resolution Date by SENAO's Board of Directors	Stock Options Units (Thousand)	Exercise Price (NT\$)
2007.10.16	2007.10.31	6,181	\$42.60 (Original price \$44.20)
2012.05.28	2013.04.29	10,000	\$84.30 (Original price \$93.00)

Each option is eligible to subscribe for one common share when exercisable. Under the terms of the SENAO Plans, the options are granted at an exercise price equal to the closing price of the SENAO's common shares listed on the TSE on the higher of closing price or par value. The SENAO Plans have

exercise price adjustment formula upon the issuance of new common shares, capitalization of retained earnings and/or capital reserves, stock split as well as distribution of cash dividends, except (i) in the case of issuance of new shares in connection with mergers and in the case of cancellation of outstanding shares in connection with capital reduction, and (ii) except if the exercise price after adjustment exceeds the exercise price before adjustment. The options of all the Plans are valid for six years and the graded vesting schedule for which 50% of option granted will vest two years after the grant date and another two tranches of 25%, each will vest three and four years after the grant date respectively.

SENAO elected not to apply IFRS 2 retrospectively for the share-based payment transactions which were granted and vested before the transition date.

Stock options granted on May 7, 2013 applied IFRS 2. The recognized compensation cost was \$93,287 thousand and \$69,579 thousand for the years ended December 31, 2014 and 2013, respectively.

SENAO modified the plan terms of the outstanding stock options in July 2014 and June 2013 for 2013 Plan, the exercise price changed from \$89.40 to \$84.30 per share and \$93.00 to \$89.40 per share, respectively. The modification did not cause any incremental fair value.

Information about SENAO's outstanding stock options for the years ended December 31, 2014 and 2013 were as follows:

	<u>Year Ended December 31, 2014</u>	
	<u>Granted on May 7, 2013</u>

SENAO used the fair value method to evaluate the options using the Black-Scholes model and the related assumptions and the fair value of the options were as follows:

	Stock Options Granted as of May 7, 2013
Dividends yield	-
Risk-free interest rate	0.91%
Expected life	4.375 years
Expected volatility	36.22%
Weighted-average fair value of grants (NT\$)	\$28.72

Had SENAO used the fair value method to evaluate the options using the Blake-Scholes model, the Assumption SENAO used and the fair value of the options would have been as follows:

	Stock Options Granted as of October 31, 2007
Dividends yield	1.49%
Risk-free interest rate	2.00%
Expected life	4.375 years
Expected volatility	39.82%
Weighted-average fair value of grants (NT\$)	\$13.69

b. CHPT share-based compensation plan

CHPT granted 1,000 stock options to its qualified employees in December 2008. Under the CHPT option plan, each stock option entitles the holder to subscribe one thousand common shares at \$12.60 per share. The options are valid for five years. The qualified employee is able to exercise some percentages of stock option after two years of the grant date. After the option is granted, the stock

exercise price will be adjusted based on formula when CHPT has major change in common stock or distributes cash dividend.

For the year ended December 31, 2013 information about CHPT's outstanding stock options were as follows:

	<u>Year Ended December 31, 2013</u>	
	Number of Options	Weighted- average Exercise Price (NT\$)
<u>Employee stock options</u>		
Balance on January 1	920	\$ 10.10
Options exercised	(810)	10.10
Options expired	<u>(110)</u>	-
Balance on December 31	<u> -</u>	-
Options exercisable at end of the year	<u> -</u>	-

The share registration of 810 thousand employee stock options exercised in 2013 has been completed. 110 thousand of unexercised employee stock options were expired in December 2013. As of December 31, 2014 and 2013, CHPT has no outstanding employee stock options.

CHPT used the fair value to evaluate the options using the Black-Scholes model, the assumptions and the fair value of the options of CHPT would have been as follows:

	Stock Options Granted as of December 31, 2008
Dividends yield	-
Risk-free interest rate	2.00%
Expected life	3.1 years
Expected volatility	20%
Weighted-average fair value of grants	\$3.80

34. NON-CASH TRANSACTIONS

For the years ended December 31, 2014 and 2013, the Company entered into the following non-cash investing activities:

	<u>Year Ended December 31</u>	
	2014	2013
Aquisitions in property, plant and equipment	\$ 32,084,102	\$ 36,726,404

	<u>\$ 32,559,459</u>	<u>\$ 36,381,555</u>

35. OPERATING LEASE ARRANGEMENTS

a. The Company as lessee

Except for the ST-2 satellite referred in Note 38 to the consolidated financial statement, the Company entered into several lease agreements for base stations located all over in Taiwan. The future aggregate minimum lease payments under non-cancellable operating leases are as follows:

	<u>December 31</u>	
	<u>2014</u>	<u>2013</u>
Within one year	\$ 3,050,119	\$ 3,061,204

	<u>\$ 10,371,688</u>	<u>\$ 11,170,603</u>

b. The Company as lessor

The Company lease out some land and buildings. The future aggregate minimum lease collection under non-cancellable operating leases are as follows:

	<u>December 31</u>	
	<u>2014</u>	<u>2013</u>
Within one year	\$ 410,921	\$ 444,919
Longer than one year but within five years	524,697	659,080
Longer than five years	<u>395,675</u>	<u>165,260</u>
	<u>\$ 1,331,293</u>	<u>\$ 1,269,259</u>

36. CAPITAL MANAGEMENT

The Company manages its capital to ensure that entities in the Company will be able to continue as going concerns while maximising the return to stakeholders through the optimisation of the debt and equity balance.

The capital structure of the Company consists of debt of the Company and the equity attributable to the parent.

The management reviews the capital structure of the Company as needed. As part of this review, the management considers the cost of capital and the risks associated with each class of capital.

According to the management's suggestion, the Company maintains a balanced capital structure through paying cash dividends, increasing its share capital, purchasing treasury stock, and proceeds from new debt or repayment of debt.

Note b: The balances included financial assets carried at cost which were classified as available-for-sale financial assets.

Note c: The balances included short-term loans, trade notes and accounts payable, payables to related parties, certain other payables, customer's deposits and long-term loans which were financial liabilities carried at amortized cost.

Fair Value Information

a. Financial instruments that are not measured at fair value

Except for what disclosed in the following table, the fair values of financial instruments not measured at fair value are considered approximately to their carrying amounts or the fair values cannot be reliably estimated:

	December 31			
	2014		2013	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value

b. Financial instruments measured at fair value

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable.

- 1) Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities.
- 2) Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- 3) Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

There were no transfers between Levels 1 and 2 for the years ended December 31, 2014 and 2013.

- c. Valuation techniques and assumptions applied for the purposes of measuring fair value.

The fair values of financial assets and financial liabilities are determined as follows:

- 1) The fair values of financial assets and financial liabilities with standard terms and conditions and traded on active liquid markets are determined with reference to quoted market prices.
- 2) Forward exchange contracts are measured using quoted forward exchange rates and yield curves derived from quoted interest rates matching maturities of the contracts. Where such prices are not available, the value of the forward exchange contracts were calculated based on the forward exchange rate on the maturity date quoted by the financial institutions separately. Estimates and assumptions used in valuation techniques are consistent with the information used by market participants in determining the prices of financial instruments.

Financial Risk Management Objectives

The main financial instruments of the Company include equity and debt investments, accounts receivable, accounts payables and loans. The Company's Finance Department provides services to its business units, co-ordinates access to domestic and international capital markets, monitors and manages the financial risks relating to the operations of the Company through internal risk reports which analyze exposures by degree and magnitude of risks. These risks include market risk (including currency risk, interest rate risk and other price risk), credit risk, and liquidity risk.

The Company seeks to minimize the effects of these risks by using derivative financial instruments to hedge risk exposures. The use of financial derivatives is governed by the Company's policies approved by the board of directors. Those derivatives are used to hedge the risks of exchange rate and interest rate fluctuation arising from operating or investment activities. Compliance with policies and risk exposure limits is audited by the Company's Finance Department on a continuous basis. The Company does not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes.

Chunghwa reports the significant risk exposures and related action plans timely and actively to the audit committee and if needed to the board of directors.

- a. Market risk

The Company is exposed to market risks of changes in foreign currency exchange rates and interest rates. The Company uses forward exchange contracts to hedge the exchange rate risk arising from assets and liabilities denominated in foreign currencies.

There were no changes to the Company's exposure to market risks or the manner in which these risks are managed and measured.

- 1) Foreign currency risk

The carrying amounts of the Company's foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are as follows:

	December 31	
	2014	2013
Assets		
USD	\$ 5,308,244	\$ 4,233,525
EUR	16,579	5,366

EUR	766,955	1,297,617
SGD	1,976	519

The carrying amount of the Company's derivatives with exchange rate risk exposures at the end of the reporting period are as follows:

	December 31	
	2014	2013

Foreign currency sensitivity analysis

The Company is mainly exposed to the fluctuations of the currencies listed above.

The following table details the Company's sensitivity to a 5% increase and decrease in the functional currency against the relevant foreign currencies. 5% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and forward exchange contracts. A positive number below indicates an increase in pre-tax profit or equity where the functional currency weakens 5% against the relevant currency.

	Year Ended December 31	
	2014	2013
Profit or loss		
Monetary assets and liabilities (a)		
USD	\$ (2,869)	\$ 31,067
EUR	(37,519)	(64,613)
SGD	3,769	7,066
RMB	5,608	7,362
Derivatives (b)		
USD	10,995	4,502
Equity		
Derivatives (c)		
EUR	(4,502)	-

a) This is mainly attributable to the exposure to the outstanding foreign currency denominated receivables and payables of the Company outstanding at the end of the reporting period

b) This is mainly attributable to the forward exchange contracts.

- c) This is mainly attributable to the changes in the fair value of derivatives that are designated as cash flow hedges

For a 5% strengthening of the functional currency against the relevant currencies, there would be a comparable impact on the pre-tax profit or equity, and the balances above would be negative.

2) Interest rate risk

The carrying amount of the Company's exposures to interest rates on financial assets and financial liabilities are as follows:

	December 31	
	2014	2013
Fair value interest rate risk		
Financial assets	\$ 21,270,570	\$ 5,682,095
Financial liabilities	564,400	224,357
Cash flow interest rate risk		
Financial assets	4,625,384	10,609,392
Financial liabilities	1,900,000	1,730,000

Interest rate sensitivity analysis

The sensitivity analyses below have been determined based on the exposure to interest rates for non-derivative instruments at the end of the reporting period. A 25 basis point increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

If interest rates had been 25 basis points higher/lower and all other variables were held constant, the Company's pre-tax profit would increase/decrease by \$6,318 thousand and \$22,223 thousand for the years ended December 31, 2014 and 2013, respectively. This is mainly attributable to the Company's exposure to floating rates on its financial instruments and short-term and long-term loan.

3) Other price risks

The Company is exposed to equity price risks arising from equity investments. Equity investments are held for strategic rather than trading purposes. The management managed the risk through holding various risk portfolios. Further, the Company assigned finance and investment departments to monitor the price risk.

Equity price sensitivity analysis

The sensitivity analyses below have been determined based on the exposure to equity price risks at the end of the reporting period.

If equity prices of listed equity securities had been 5% higher/lower:

Other comprehensive income would increase/decrease by \$195,711 thousand and \$152,712 thousand as a result of the changes in fair value of available-for-sale assets for the years ended December 31, 2014 and 2013, respectively.

b. Credit risk

Credit risk refers to the risk that a counterparty would default on its contractual obligations resulting in financial loss to the Company. The maximum credit exposure of the aforementioned financial instruments is equal to their carrying amounts recognized in consolidated balance sheet as of the balance sheet date.

The Company serves a large consumer base, and the concentration of credit risk was limited.

c. Liquidity risk

The Company manages and contains sufficient cash and cash equivalent position to support the operations and reduce the impact on fluctuation of cash flow.

1) Liquidity and interest risk tables

The following tables detailed the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company is required to pay.

38. RELATED PARTIES TRANSACTIONS

The ROC Government, one of Chunghwa's customers held significant equity interest in Chunghwa. Chunghwa provides fixed-line services, wireless services, Internet and data and other services to the various departments and institutions of the ROC Government and other state-owned enterprises in the normal course of business and at arm's-length prices. The information on service revenues from government bodies and related organizations have not been provided because the ROC government has significant influence over Chunghwa. Chunghwa believes that all revenues and costs of doing business are reflected in the consolidated financial statements.
