### 3) Cash Flows Differences

The Company applies ROC SFAS No. 17, "Statement of Cash Flows". Its objectives and principles are similar to those set out in U.S. standards. The principal differences between the two standards relate to classification. Cash flows from investing activities for changes in other assets, and cash flows from financing activities for changes in customers' deposits and other liabilities are reclassified to operating activities under U.S. standards.

Note 1: There are significant differences in the classification of items on the statements of income under ROC GAAP and US GAAP. These include:

- (1) Incentives paid to third party dealers for inducing business:
  - Under ROC GAAP: Such account is included in operating expenses.
  - Under US GAAP: Such account is included in cost of revenues.
  
- (2) Gains (losses) on disposal of property, plant and equipment and other assets:
  - Under ROC GAAP: Such account is included in non-operating income (expenses).
  - Under US GAAP: Such account is included in cost of revenues.

## 2. RECENT ACCOUNTING PRONOUNCEMENTS NOT YET ADOPTED

In September 2009, the FASB issued new guidance relating to revenue arrangements with multiple deliverables which established the accounting and reporting guidance for arrangements under which the vendor will perform multiple revenue-generating activities. Specifically, the update addresses how to separate deliverables and how to measure and allocate arrangement consideration to one or more units of accounting. The update is effective for fiscal years beginning on or after June 15, 2010. The Company is currently evaluating the impact of the adoption of the update.
